

IREA Named “Business of the Month” by the Castle Rock Chamber

The Castle Rock Chamber of Commerce has just announced its Business of the Month recipient – Intermountain Rural Electric Association. Some of the essential criteria for being recognized are the length of time a business has supported the Chamber – ten consecutive years or longer – through its membership, participation and sponsorship.

IREA was formed in 1938 and is lead by an elected Board of Directors whose goal is to provide customers with “reliable electric service at the lowest possible cost.” Through the Board and General Manager Stan Lewandowski’s leadership, IREA went 22 years without a rate increase.

IREA serves all or portions of 10 counties, has over 138,000 customers and was chosen the 2nd Best West-Midsize Utility in 2009 for “Customer Satisfaction” by J.D. Powers and Associates.

IREA is a strong believer in community partnerships and supports important causes such as senior organizations, the 9Health Fair, a strong educational system, and a strong business environment that creates jobs and business opportunities through organizations such as the Castle Rock Chamber and others.

IREA will continue to speak out on issues that drive up electric rates, destroy businesses and jobs, and create lost opportunities for the community and IREA members.
